### Pump Oil on February 18

ers Transportation Co. running through the California oil fields to Port Har-ford will be completed on February 15.

This pipe line passes almost along the easterly line of the oil fields of the TEMPLOR RANCH OIL CO, and this company will commence to deliver its entire daily product direct to the pipe This will mean the early payment of dividends, and I expect the company will soon be able to pay at the rate of one cent a share monthly It has also been planned to list the stock on the San Francisco Oil Eschange shortly after the company commences the delivery of oil. This will undoubtedly cause the stock to advance to probably 50c per share, or better. I have secured and offer a small block of the stock at 30c per share. I unbesitatingly recommend the purchase of these shares as an investment that should double and quadruple in value. Bear in mind that the investor who reaps the largest profits is the one who invests when the price is low. Compare the stock of the TEMPLOR RANCH OIL CO. with every oil stock on the market today, and you will surely invest in the shares of this company. Do not delay, but send in your order NOW. P. E. R. STRAUCH,

Tel, 445. Room 1, Waity Building.

#### PINCHOT SCORES SPECIAL INTERESTS

Warns Brainst Conservation in In-terest of the Few With Disre-pard For the People at Large— Golden Rule Not In It.

NEW YORK-"Special interests have made repeated attacks on the United States forest service and those attacks have increased in violence just in proportion as the service has offered effective opposition to predatory wealth," said Gifford Pinchot, chief of the United States forest service will make you ice, in a speech Monday at a lunchcon given him by a number of publishers Mrs. C. Le Dickerson received new Mr. Pinchot took as his subject for millingry goods on the Alameda of the very latest styles.

Opportunity." Mr. Dischard and Equal of New York at the University Club.

Opportunity." Mr. Pinchot said:
"The American people have evident
by made up their minds that our nat ural resources must be conserved. That is good, but it settles only half the question. For whose benefit shall they be conserved-for the benefit of the many for the use and profit of the few? The great conflict now being fought will decide.

Ensign Lando, a Honolelu boy, is with the fleet and this morning was on duty at the police station looking will be so difficult to straddle, as the after the ship patrol.

Phone 5 and ask for Manuel Richard est and equal opportunity, between "There is no other question before the privileges of the few and the rights of the many, between government by men for human welfare and government by money for profit, be-tween the men who stand for the Roosevelt policies and the men who stand against them. This is the essence of the conservation problem to-

> issue. When a few men get posses sion of one of the necessities of life either through ownership of a natural resource or through unfair business methods, and use that control to extort undue profits, as in the recent cases of the sugar trust and the beef packers, they injure the average man without good reason, and they are guilty of a moral wrong.

"I believe in one form of govern ment and I believe in the golden rule But we must face the truth that monopoly of the resources of produc-tion makes it impossible for vast num bers of men and women to earn a fair living. Right here the conservation question touches the daily life of the great body of our people, who pay the cost of special privilege-and the price is heavy.

"The people of this country have lost vastly more than they can over regain by gifts of public property, forever and without charge, to men who gave nothing in return. It is true that we have made superb ma terial progress under this system, but it is not well for us to rejoice too freely in the slices the special inter-

ests have given us from the great loaf of the property of all the people. "The people of the United States have been the complacent victims of a system of plunder often pe petrate! by men who would have been sur-prised beyond measure to be accused of wrong-doing and many of whom in their private lives were model citizens. But they have suffered from a cffrioumoral perversion by which 't becomes praiseworthy to do for a corporation things which they would refuse with the liftiest scorn to do for themselves. Fortunately for us all that delusion

is passing rapidly away.
"It is the honorable distinction of the forest service that it has been more constantly, more violently and more bitterly attacked by the representatives of the special interests in recent years than any other government bureau.
"These attacks have increased in

d bitterness just in pre portion as the service has offered effective opposition to predatory wealth. The more successful we have been in preventing land grabbing and the aborption of water-power by the special interests, the more ingenious, the more devious and the more dangerous these atacks have become. A favorite one is to assert that the forest service, in its zeal for the public welfare, has played ducks and drakes with the acts

"The fact is, on the contrary, that the service has had warrant of law for everything it has done. Not once since it was created has any charge of illegality, despite the most search ing investigation and the bitterest attack, ever led to reversal or re-proof by either House of Congress

or by any congressional committee "Another and unusually plausible form of attack is to demand that all land not now bearing trees shall be thrown out of the national forests.

"Still another attack, nearly suc cessful two years ago, was at attempt to prevent the forest service from telling the people, through the press what it is accomplishing for them and how much this nation needs the forest.

"Since the forest service called pub le attention to the rapid absorption of the water-power sites and threatening growth of a great waterlower monopoly, the attacks upon it lave increased with marked rapidity I anticipate that they will continue to do so. Still greater opposition is promised in the near future. There is but one protection—an awakened public opinion. That is why I give you the facts."
